

TransVuE Window Films

(Rear Projection)

Is your message being ignored or lost in a clutter of “sameness?” Would you like people to stand and take notice while positioning your organization as “cool” and “leading edge?” You need a TransVuE 70 (*see-thru*) projection display. Whether mounted on a glass surface or on acrylic to use as a free hanging display the TransVuE will grab people’s attention. Yet it won’t break your budget.

There are 3 versions of TransVuE films – see-thru, semi-transparent, and high contrast. They all come with a water activated self adhesive, and are ready to mount. The type of TransVuE film used will depend on the lighting conditions and the desired affect to be achieved. Yet each one maintains the flexibility to be mounted on flat or curved glass and acrylic surfaces.

Key Features:

- Diagonals to 80” in 4 x 3, and 100” in 16 x 9 aspect ratios.
- Available as a hard-type, free hanging display when mounted on acrylic.
- Ready to apply, water activated self adhesive
- Custom shapes and sizes available
- Low cost
- No specific projection angle required
